2nd Emirates Surgeons International Conference ESIC

-  17th - 18th **November** 2023
-  **Conrad Hotel, Sheikh Zayed Road Dubai, UAE**

Organizing By:

Welcome Message

Dear Colleagues,

On behalf of the University Hospital Sharjah, I have the honor and pleasure to announce the Emirates Surgeons International Conference (ESIC), to be held in 17th - 18th November 2023, in Conrad Dubai, Sheikh Zayed Road, Dubai, UAE.

With the support of the University Hospital Sharjah the conference aims at presenting to participants all latest developments in the field of General surgery and minimal invasive Surgery covering breakthrough operative techniques which apply to the breast, thyroid, colon and metabolic syndrome and hernia surgery, signaling a new era in endocrine and metabolic surgery.

The programme will comprise an exciting combination of lectures and practical workshops, presenting the latest in innovative techniques in minimal invasive surgery.

We invite you to send us your clinical studies for presentation and honor us with your active participation in the conference.

Sincerely,

Prof. Tarek Mahdi

President of the Conference

HOD of General and Bariatric surgery - UHS.
Professor of Endocrine and Metabolic Surgery
in Mansoura Faculty of Medicine, Mansoura University.

Dubai is the most populous city and emirate in the United Arab Emirates (UAE), and the second largest emirate by territorial size after the capital, Abu Dhabi. Dubai is located on the southeast coast of the Persian Gulf and is one of the seven emirates that make up the country. Abu Dhabi and Dubai are the only two emirates to have veto power over critical matters of national importance in the country's legislature. The city of Dubai is located on the emirate's northern coastline and heads up the Dubai-Sharjah-Ajman metropolitan area.

Dubai hosted World Expo 2021. Dubai has emerged as a global city and business hub of the Persian Gulf region. It is also a major transport hub for passengers and cargo. By the 1960s Dubai economy was based on revenues from trade and, to a smaller extent, oil exploration concessions, but oil was not discovered until 1966. Oil revenue first started to flow in 1969. Dubai's oil revenue helped accelerate the early development of the city, but its reserves are limited and production levels are low today, less than 5% of the emirate's revenue comes from oil.

The emirate's Western-style model of business drives economy with the main revenues now coming from aviation, real estate, and financial service.

Dubai has recently attracted world attention through innovative large construction projects and sports events. city has become symbolic for its skyscrapers and high-building, in particular the world's tallest building, Burj Khalifa. Dubai has been criticized for human rights concerning the city's largely South Asian workforce.
